

OJJ Smart Lock X1

Fingerprint Unlock/ Temporary Access
Work with Mi-Home APP

4 Ways To Unlock

Fingerprint

APP(Bluetooth)

PIN Code

Mechanical Key

Open The Door In Just One Step

No need to take your key with you! Put your finger at the handle with the fingerprint reader hidden inside, the door will open in just one step.

Temporary Access

You can make one-time password or periodic password send to your friends, cleaner, Airbnb clients etc. And, you do not have to worry that they might duplicate your key. It will be expired after the time you set.

C-class Lock Cylinder

OJJ advanced straight insert cylinder design, and the lock cylinder has reached the C-class safety level. Strong anti-breaking performance, higher safety factor.

Anti-theft Mode & Intrusion-Alarm

OJJ also have intelligent alarm system. If enter password error 5 times or fingerprint error 15 times, or someone forced pried your lock, OJJ will set off local alarm and notice via mi-home app immediately .

Work with Mi-Home APP

OJJ work with Mi-home app. When you open the door other Mi-home smart devices like Milight which can opens automatically.

Financial-grade Security Protection

OJ built in Mi-home security chip, which can achieve financial-grade security. The security chip authenticates and encrypts to ensure the security of data transmission and interaction in the user's device .
